LAB EXP 1

Flight Reservation System Using Zoho Creator (SaaS)

AIM:

To create a **Flight Reservation System** using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

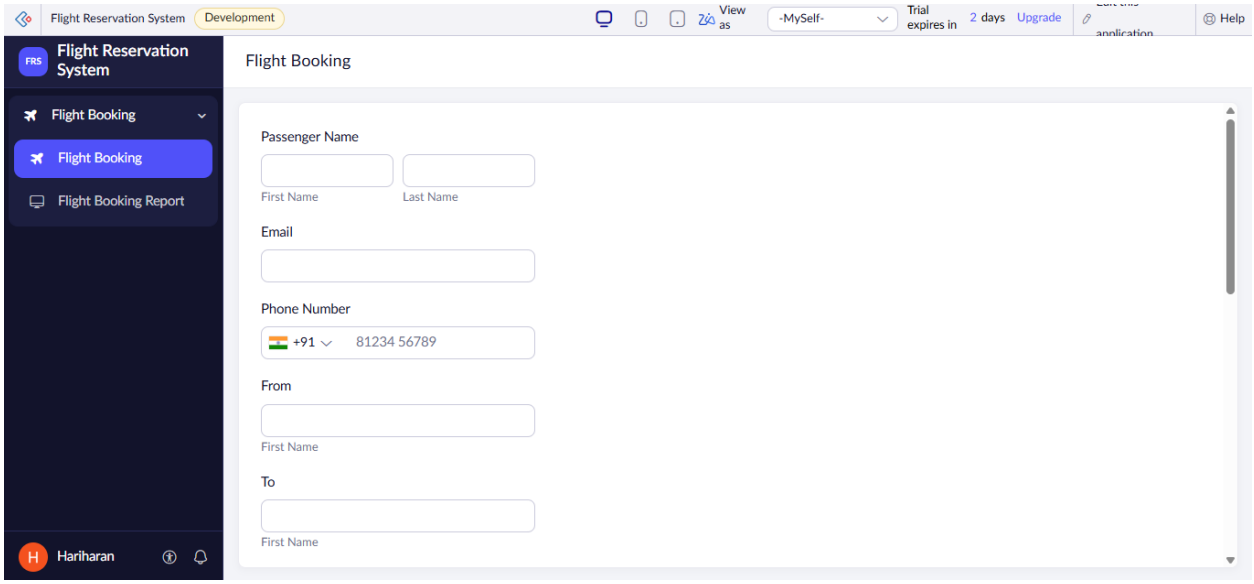

PROCEDURE:

1. Log in to the **Zoho Creator** cloud platform.
2. Create a new application named **Flight Reservation System**.
3. Create a form named **Flight Booking**.
4. Add the required fields to the form:
    - Passenger Name (First Name and Last Name)
    - Email
    - Phone Number
    - From
    - To
    - Flight Type
    - Trip Type
    - Travelers
    - Class
    - Fare Type
    - Ticket Price
    - Date and Time of Departure
5. Configure the field types according to the data required.

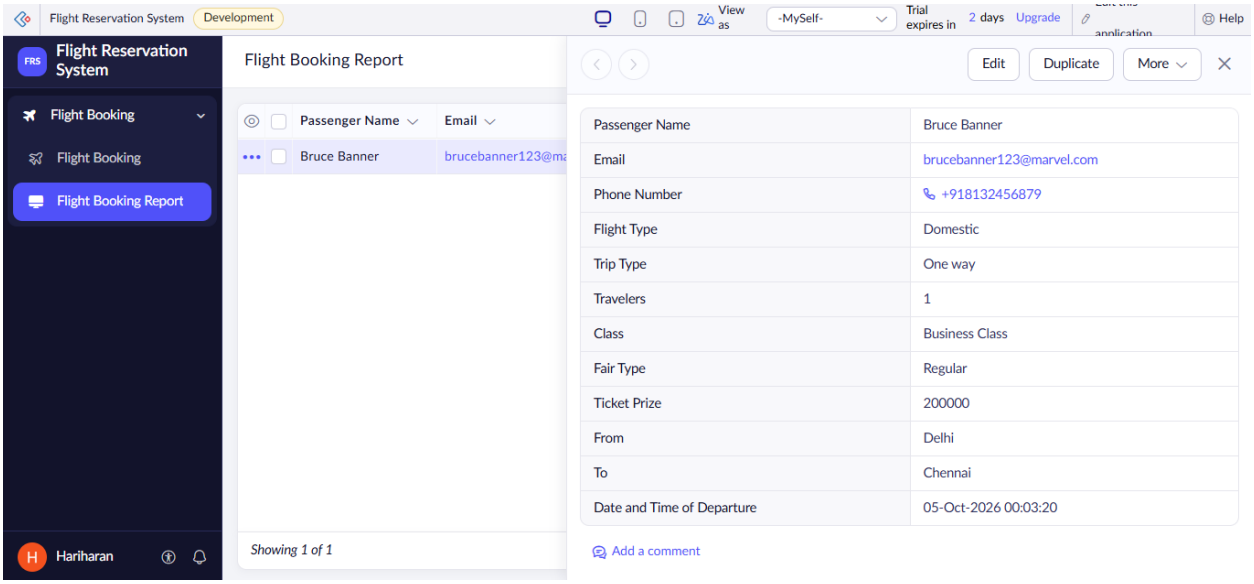

6. Arrange the fields properly to make the form simple and user-friendly.
7. Save and publish the **Flight Booking** form.
8. Enter sample passenger details, including contact information and travel details.
9. Submit the form to store the flight reservation information in the cloud.
10. Create a report named **Flight Booking Report** to display the submitted booking records.
11. Verify the submitted passenger details, flight type, trip type, class, ticket price, departure location, destination, and departure date and time.
12. Test the application by entering different flight booking details and confirming that the records are displayed correctly in the report.
13. Verify that the **Flight Reservation System** works successfully as a SaaS application.

IMPLEMENTATION:

INPUT:

OUTPUT:

RESULT:

The **Flight Reservation System** was created successfully using Zoho Creator. Passenger details and flight booking information were stored in the cloud and displayed in the Flight Booking Report.
