LAB EXP 2

Property Buying and Rental System Using Zoho Creator (SaaS)

AIM:

To create a **Property Buying and Rental System** for Chennai city using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

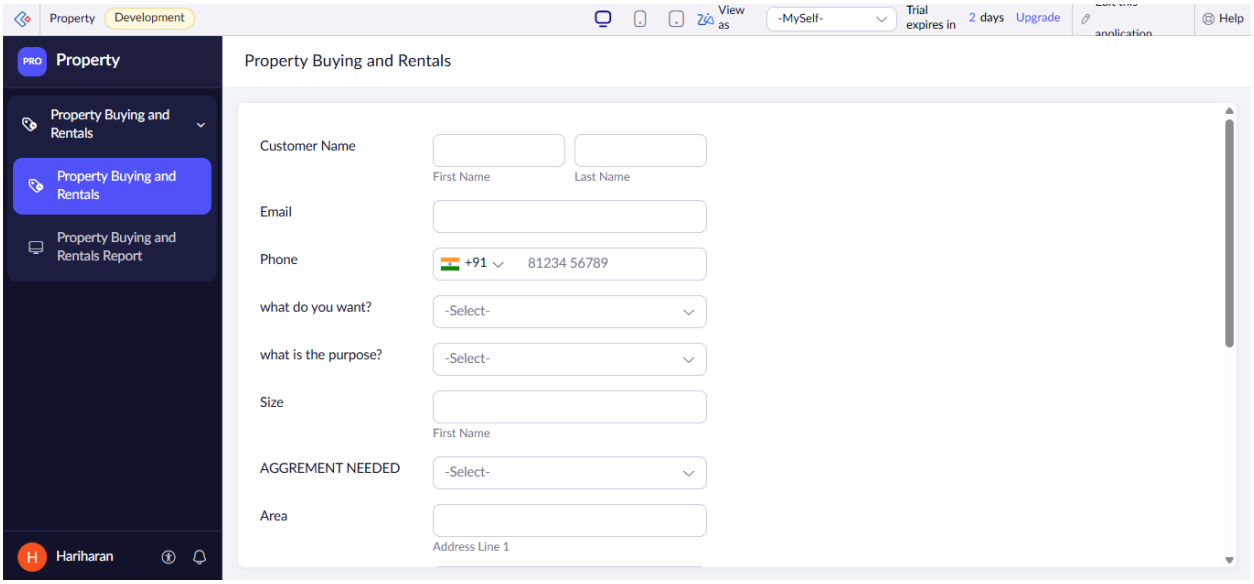

PROCEDURE:

1. Log in to the **Zoho Creator** cloud platform.
2. Create a new application named **Property Buying and Rentals**.
3. Create a form named **Property Buying and Rentals**.
4. Add the required fields to the form:
    - Customer Name
    - Email
    - Phone
    - What Do You Want? (Buy/Rent)
    - What Is the Purpose? (Residential/Commercial)
    - Size
    - Agreement Needed (Yes/No)
    - Area
    - Place
    - Price Range
    - Property Value
5. Configure the field types according to the required data, such as text, email, phone number, dropdown, and number fields.
6. Set the dropdown options for property requirements, including **Buy, Rent, Residential, and Commercial**.
7. Arrange the fields properly to make the form simple and user-friendly.

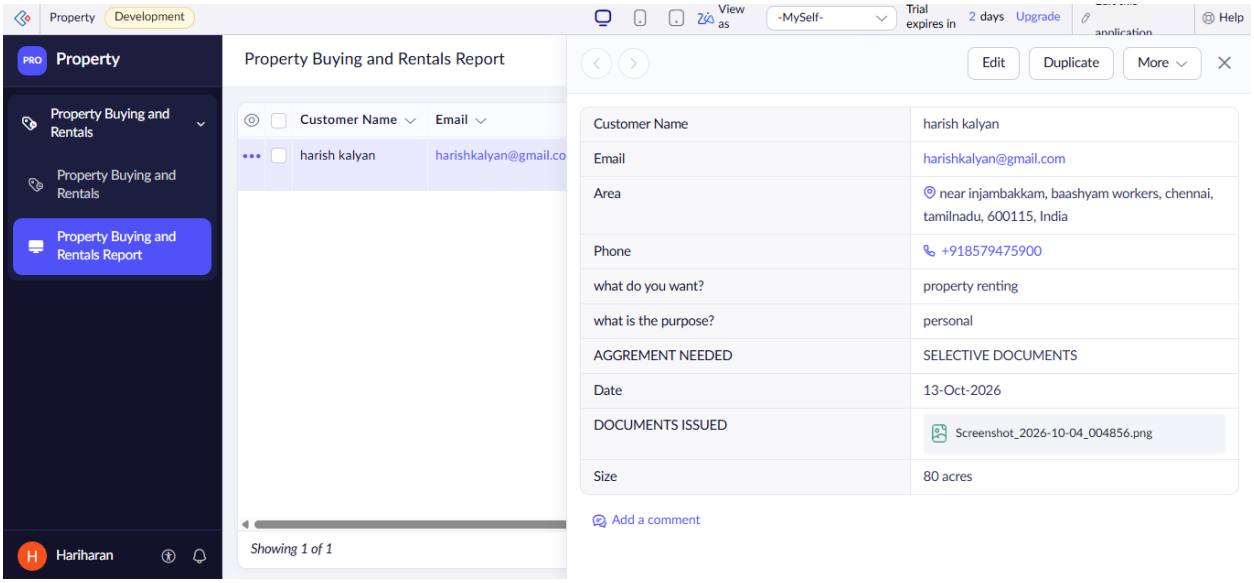

8. Save and publish the **Property Buying and Rentals** form.
9. Enter sample customer details and property requirements for locations in Chennai city.
10. Submit the form to store the property details in the cloud.
11. Create a report named **Property Buying and Rentals Report** to display the submitted records.
12. Verify the customer details, property type, agreement requirement, area, place, price range, and property value in the report.
13. Test the application by entering different property buying and rental requirements.
14. Verify that the **Property Buying and Rental System** works successfully as a SaaS application.

IMPLEMENTATION

INPUT:

OUTPUT:

RESULT:

The **Property Buying and Rental System** was created successfully using Zoho Creator. Customer details and property requirements for Chennai city were stored in the cloud and displayed in the report.
