LAB EXP 3

Car Booking Reservation System Using Zoho Creator (SaaS)

AIM:

To create a **Car Booking Reservation System** using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

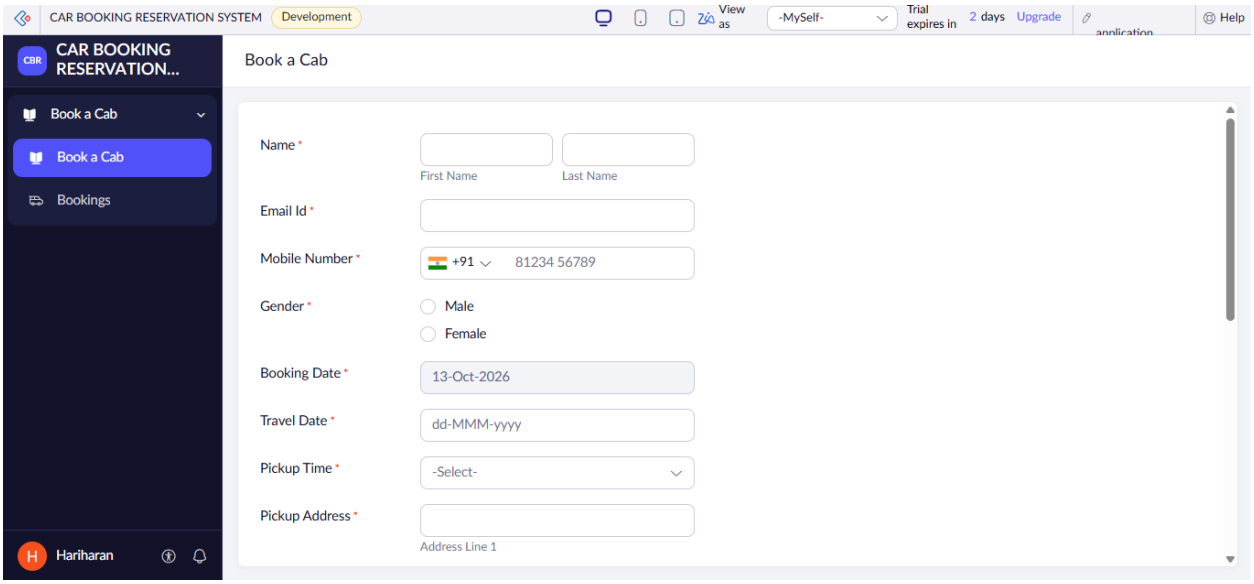

PROCEDURE:

1. Log in to the **Zoho Creator** cloud platform.
2. Create a new application named **Car Booking Reservation System**.
3. Create a form named **Book a Cab**.
4. Add the required fields to the form:
    - Name (First Name and Last Name)
    - Email ID
    - Mobile Number
    - Gender
    - Booking Date
    - Travel Date
    - Pickup Time
    - Pickup Address
    - Drop Address
    - Cab Type
    - Number of Passengers
    - Payment Method
5. Configure the field types according to the required data, such as name, email, phone number, radio buttons, date, dropdown, and address fields.
6. Mark the necessary fields as **mandatory** to ensure that users enter the required booking information.

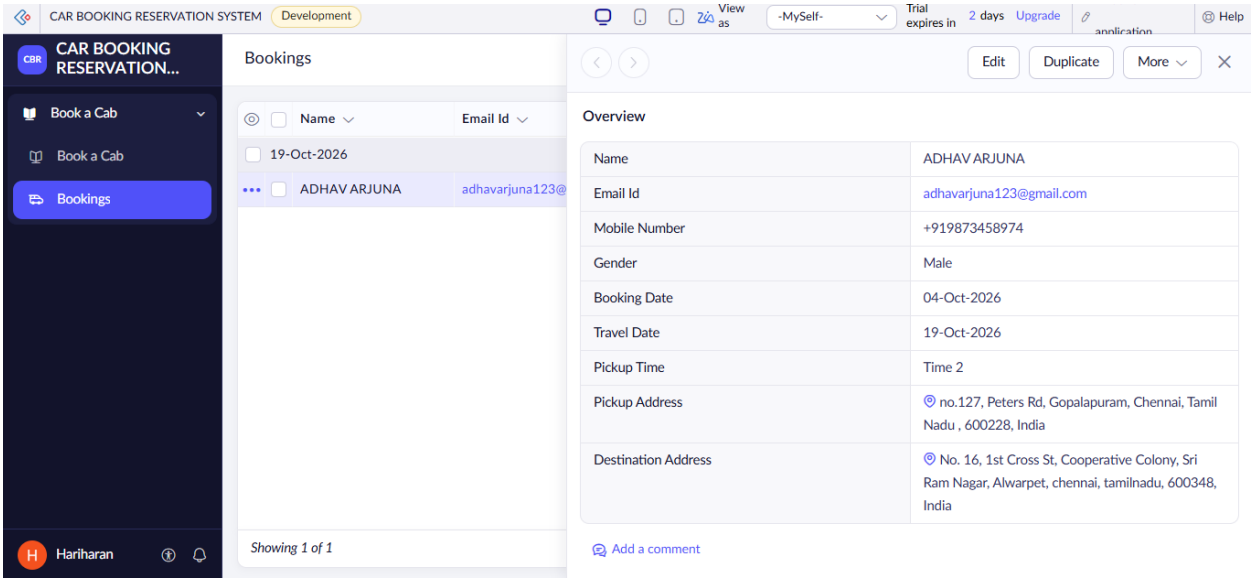

7. Arrange the fields properly to make the booking form simple and user-friendly.
8. Save and publish the **Book a Cab** form.
9. Enter sample customer details, booking date, travel date, pickup time, and pickup and drop addresses.
10. Submit the form to store the cab booking information in the cloud.
11. Create a report named **Bookings** to display the submitted reservation records.
12. Verify the customer's name, email ID, mobile number, gender, booking date, pickup time, and other booking details in the report.
13. Test the application by entering different cab booking details and checking whether the records are displayed correctly.
14. Verify that the **Car Booking Reservation System** works successfully as a SaaS application.

IMPLEMENTATION:

INPUT:

OUTPUT:

RESULT:

The **Car Booking Reservation System** was created successfully using Zoho Creator. Customer details and cab booking information were stored in the cloud and displayed in the Bookings report.
