LAB EXP 4

SIMATS Library Book Reservation System Using Zoho Creator (SaaS)

AIM:

To create a SIMATS Library Book Reservation System using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

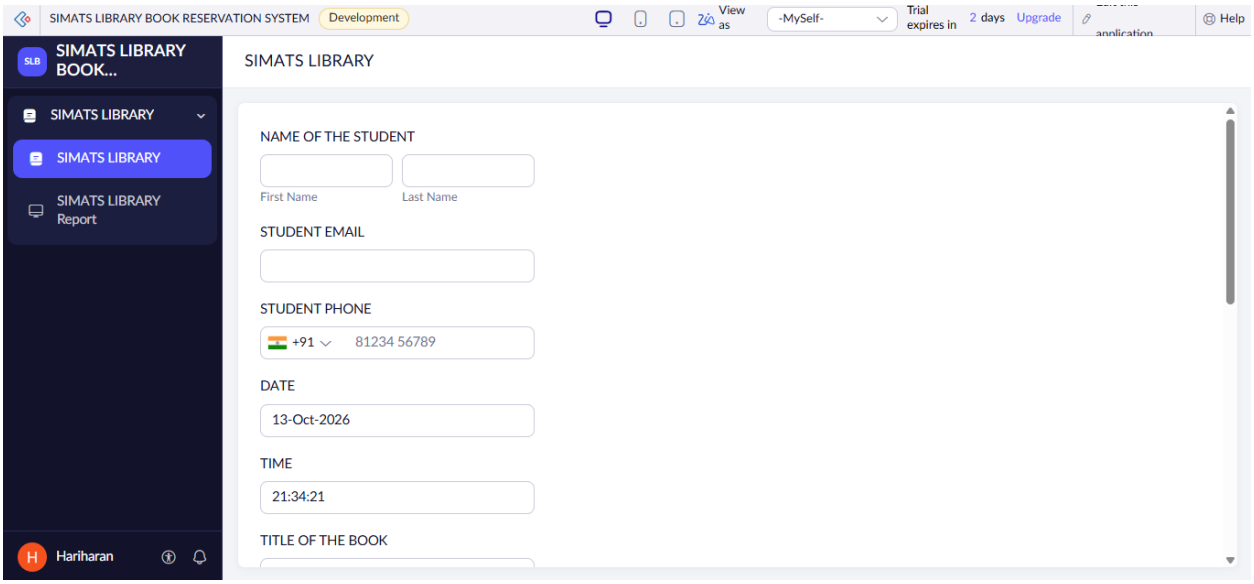

PROCEDURE:

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named SIMATS Library Book Reservation System.
3. Create a form named SIMATS Library.
4. Add the required fields to the form:
    - Name of the Student (First Name and Last Name)
    - Student Email
    - Student Phone
    - Date
    - Time
    - Title of the Book
    - Name of the Author
    - Book Category
    - Reservation Status
5. Configure the field types according to the required data, such as name, email, phone number, date, time, and dropdown fields.
6. Arrange the fields properly to make the book reservation form simple and user-friendly.
7. Save and publish the SIMATS Library form.

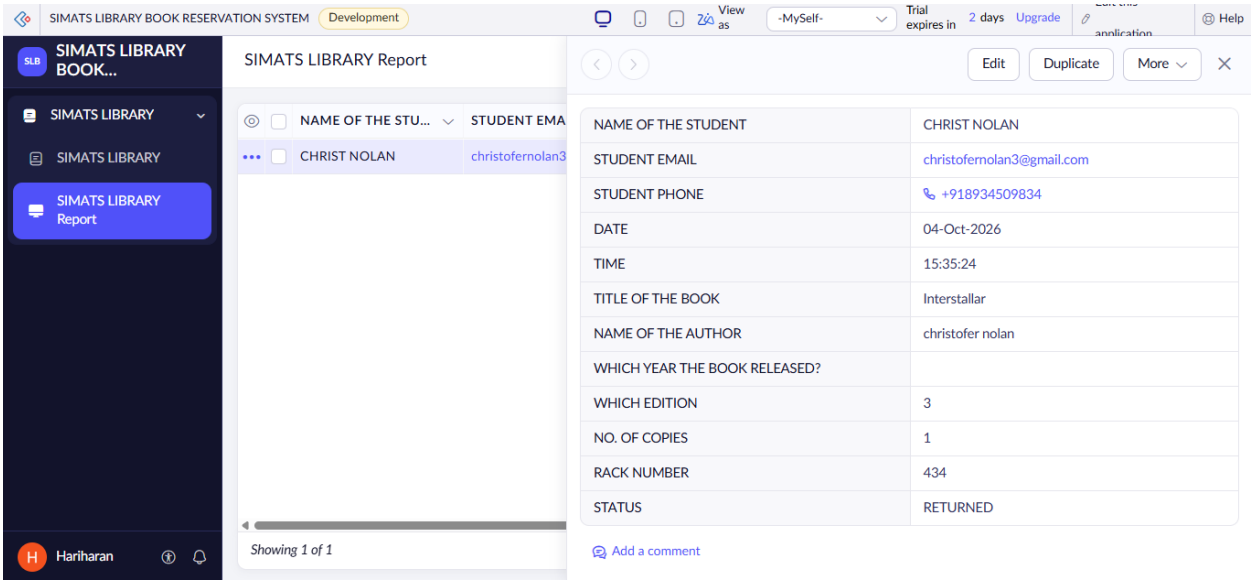

8. Enter sample student details, reservation date and time, book title, and other required book information.
9. Submit the form to store the library reservation details in the cloud.
10. Create a report named SIMATS Library Report to display the submitted reservation records.
11. Verify the student's name, email, phone number, date, time, book title, and other reservation details in the report.
12. Test the application by entering different student and book reservation details.
13. Verify that the submitted records are displayed correctly in the report.
14. Confirm that the SIMATS Library Book Reservation System works successfully as a SaaS application.

IMPLEMENTATION:

INPUT:

OUTPUT:

RESULT:

The SIMATS Library Book Reservation System was created successfully using Zoho Creator. Student details and book reservation information were stored in the cloud and displayed in the SIMATS Library Report.
