LAB EXP 5

Marksheet Processing System Using Zoho Creator (SaaS)

AIM:

To create a Marksheet Processing System using Zoho Creator as a cloud-based Software as a Service (SaaS) application to record student details, subject marks, and academic performance.

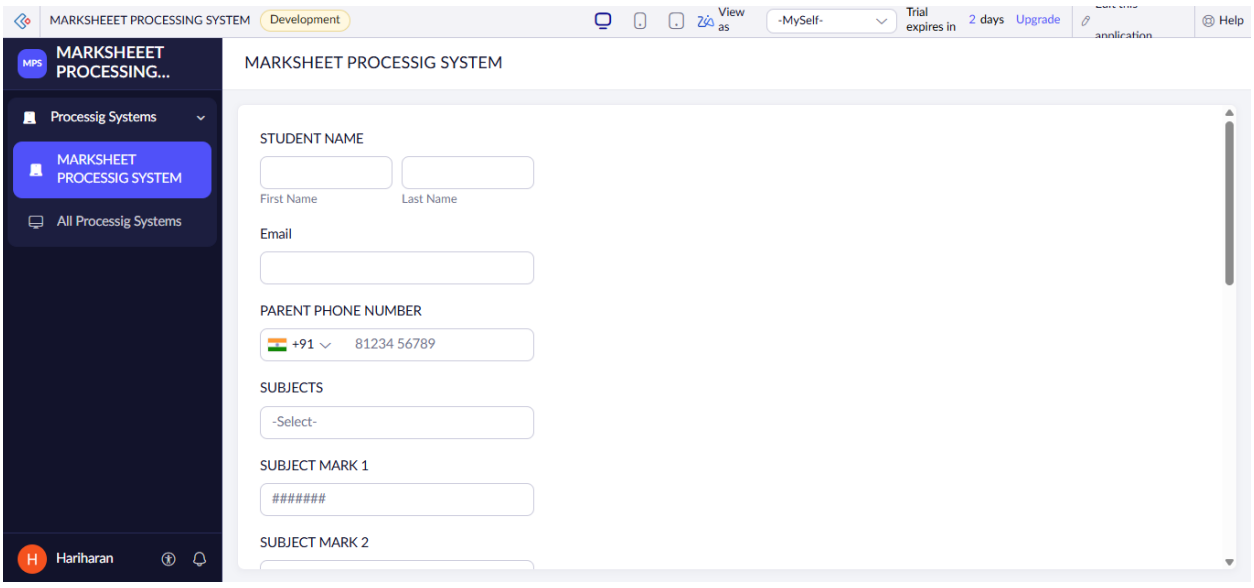

PROCEDURE:

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named Marksheet Processing System.
3. Create a form named Marksheet Processing System.
4. Add the required fields to the form:
    - Student Name (First Name and Last Name)
    - Email
    - Parent Phone Number
    - Subjects
    - Subject Mark 1
    - Subject Mark 2
    - Subject Mark 3
    - Subject Mark 4
    - Subject Mark 5
    - Subject Mark 6
5. Configure the field types according to the required data, such as name, email, phone number, dropdown, and number fields.

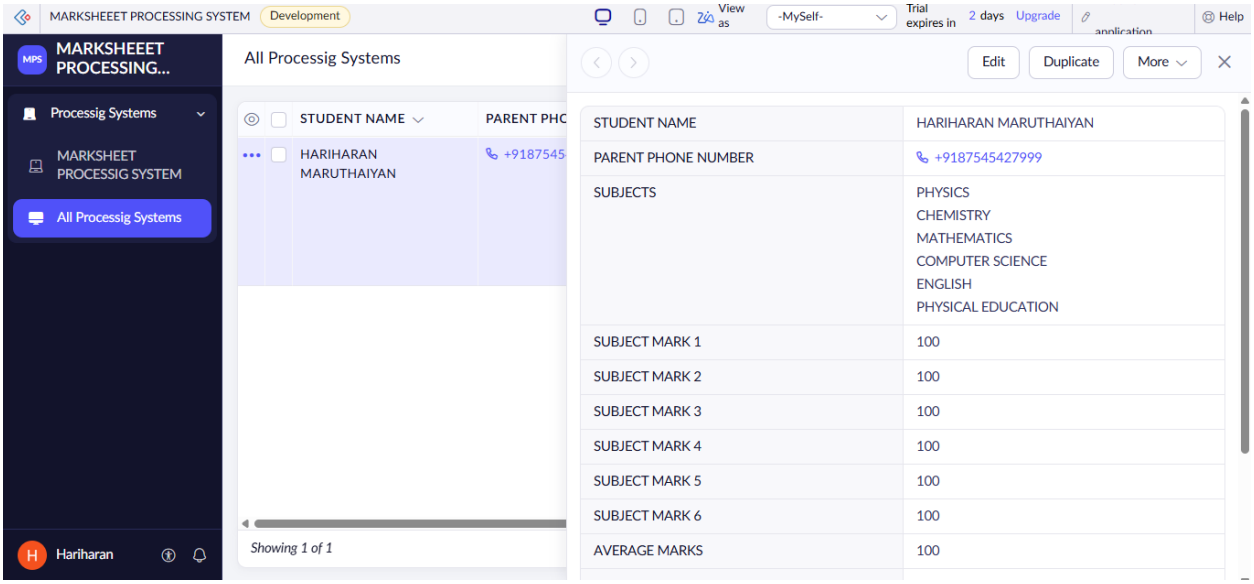

6. Set the subject options, such as Physics, Chemistry, Mathematics, Computer Science, English, and Physical Education.
7. Arrange the fields properly to make the form simple and user-friendly.
8. Save and publish the Marksheet Processing System form.
9. Enter sample student details, parent contact information, subjects, and marks.
10. Submit the form to store the student marks and academic details in the cloud.
11. Create a report named All Processing Systems to display the submitted student records.
12. Verify the student's name, parent phone number, subjects, and marks in the report.
13. Test the application by entering different student records and checking whether the marks are displayed correctly.
14. Verify that the Marksheet Processing System works successfully as a SaaS application.

IMPLEMENTATION:

INPUT:

OUTPUT:

RESULT:

The Marksheet Processing System was created successfully using Zoho Creator. Student details, subjects, and marks were stored in the cloud and displayed in the report.
