Experiment – 8

Student Counselling System Using Zoho One (SaaS)

Aim

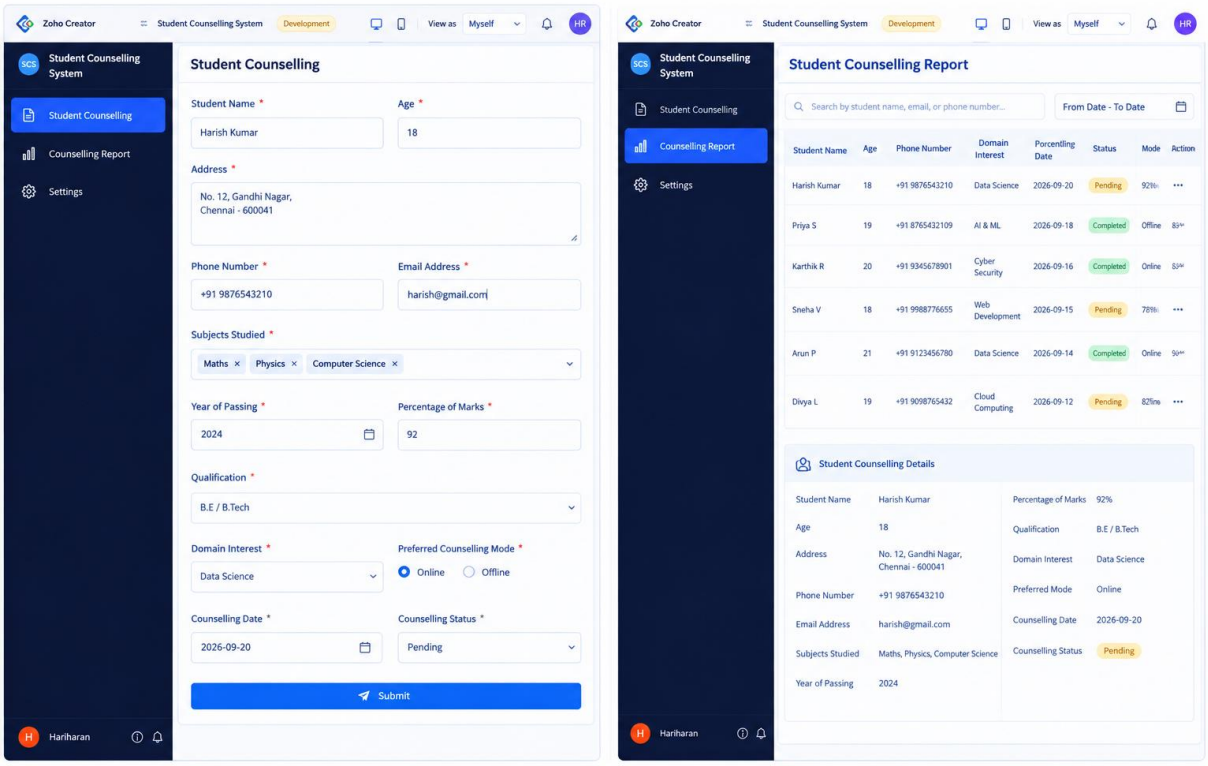

To create a Student Counselling System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

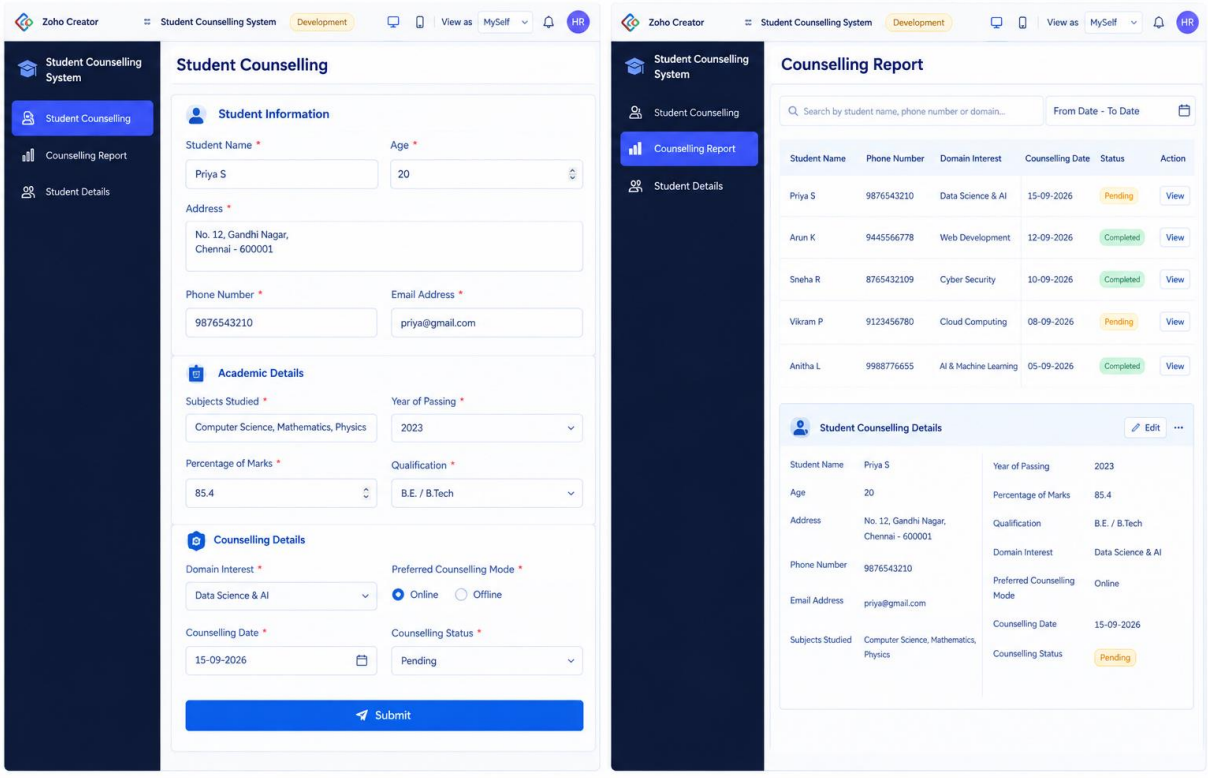

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One application.
3. Create a new application for the Student Counselling System.
4. Create a new form named **Student Counselling**.
5. Add the required fields:
    - Student Name
    - Age
    - Address
    - Phone Number
    - Email Address
    - Subjects Studied
    - Year of Passing
    - Percentage of Marks
    - Qualification
    - Domain Interest
    - Preferred Counselling Mode (Online / Offline)
    - Counselling Date
    - Counselling Status (Pending / Completed)
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample student details and counselling information into the form.
10. Submit the form and verify that the entered data is stored in the cloud.

11. Test the application by entering different student details and domain interests.
12. Verify that the Student Counselling System works successfully as a SaaS application.

Input and Output 1

Input and Output 2

Result

Thus, a Student Counselling System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
